

Clermiston Primary Wider Achievement for Parents and Carers

Wider Achievement is a term to describe everything your child might learn from hobbies, interests, volunteering, clubs, part time jobs and so on. The skills children gain from these types of activities are valuable for life, learning and future work.

Wider achievement can take many different forms. It can happen both in and outside of school and doesn't need to involve certificates, prizes or awards. Many activities are also very low cost or free. This leaflet contains some ideas for wider achievement activities you can support your child with.

Wider Achievement at Clermiston

If your child has achieved something they would like to share with us, please post on the **Wider Achievement channel** on your child's class Team. You can post a comment and add a photo or video if you wish. This will allow your child's teacher and their classmates to see their achievement – the digital equivalent of sharing their news in class. Children will be given the opportunity to talk about their achievements in class on a regular basis.

If you require support with accessing Teams, please speak to your child's teacher in the first instance.
